Production thickness factor: smooth values, slopes and curvature
$t_{max}/c = 0.05$
$t_{max}/c = 0.1$
$t_{max}/c = 0.15$
$t_{max}/c = 0.2$
$t_{max}/c = 0.25$
$t_{max}/c = 0.4$
Thickness factor (full range)
First derivative (full range)
Curvature (full range)
Thickness factor (join close-up)
First derivative (join close-up)
Curvature (join close-up)
F_t
dF_t/dz
d^2F_t/dz^2
Blend coordinate z
Blue: numerical onset, 0 < z < 0.05. Beige: z outside [0, 1]. Dashed: thickness/chord outside 0.15 to 0.25.
Factor value, slope and curvature match at both joins. The full AM reference blend is only C1 at z = 0.
