conversion loss g1.33 M2.0 — values and first derivatives

prescribed reference
current implementation

Y flag true

Kinetic-energy loss increment delta_phi^2

d(Y flag true) / dx

Kinetic-energy loss increment delta_phi^2

Y flag false

Kinetic-energy loss increment delta_phi^2

d(Y flag false) / dx

Kinetic-energy loss increment delta_phi^2

Y formula unrestricted

Kinetic-energy loss increment delta_phi^2

d(Y formula unrestricted) / dx

Kinetic-energy loss increment delta_phi^2

raw domain margin

Kinetic-energy loss increment delta_phi^2

near constant: expanded display span

d(raw domain margin) / dx

Kinetic-energy loss increment delta_phi^2

Mach effective

Kinetic-energy loss increment delta_phi^2

d(Mach effective) / dx

Kinetic-energy loss increment delta_phi^2

Y guarded before cap

Kinetic-energy loss increment delta_phi^2

d(Y guarded before cap) / dx

Kinetic-energy loss increment delta_phi^2
