
AR = 2; zero incidence; M1 = M2 = 0. Left: complete loss. Right: loading Z.
Solid: production result. Dashed: original angle expressions, only through 89 deg (may leave panel).
Beige: negative outlet trials (top) and nonphysical angles at/above 90 deg, retained as NaN.
Physical turning and cosine projection; only the mean secant has an 80/87.5 deg continuation. No final loading cap.
